

Exclusively from B-Epic Worldwide

ENGINE LIFE TREATMENT

WITH ADVANCED XPL+[®] TECHNOLOGY

50X

MORE POWERFUL

Than Ordinary Motor Oil
And Additives

Turn Any Ordinary Motor Oil into a SUPER Oil!

From lawnmowers to racing engines, B-ECO Engine Life Treatment helps extend an engine's working life and performance, including for your personal vehicle! By adding it to your motor oil, it effectively turns it into a super-lubricant – giving your vehicle's engine an extra level of protection and helping optimize fuel economy and lower maintenance costs. Plus, it comes with a FREE Limited Lifetime Engine Warranty (restrictions apply; refer to warranty for details).

Formulated with advanced XPL+[®] Xtreme Pressure Lubrication technology, B-ECO Engine Life Treatment is unmatched in protection against friction and heat. So much so that this proprietary technology is trusted by Fortune 500 companies around the world. Independent tests prove that it can withstand 50 times more load than ordinary lubricants, which means less wear and tear on your vehicle's engine.

BENEFITS & ADVANTAGES

- Helps Increase Engine Life
- Helps Optimize Fuel Economy
- Helps Lower Maintenance Costs
- Slows Oxidation and Corrosion
- Protects and Conditions Seals
- Improves Engine Power and Performance
- Extends Oil Change Intervals 25% to 50%
- Helps Protect Engine Wear During Start-Up
- Withstands Friction and High Temperatures

PRODUCT DETAILS

- Formulated for Gasoline & Diesel Engines; New or High Mileage Engines; Auto, Truck, Marine, Off-Road, Motorcycle, and Small Engines
- Environmentally Friendly, Stable, and Non-Corrosive
- Contains No Solids, No Chlorine, and No Harmful Solvents
- Compatible With All Conventional and Synthetic Motor Oil

ENGINE LIFE TREATMENT

DIRECTIONS: Add 12 oz of B-ECO Engine Life Treatment per 4-6 quarts of motor oil. For larger capacity engines, use at 10% by total volume. Repeat with each oil change. You can start using it right away, but if you are getting close to an oil change, we recommend adding it then.

WHAT IT CONTAINS: XPL+® Xtreme Pressure Lubrication + Metal Bonding Agent + Anti-Wear Agent Seal Conditioner

STORAGE: Store away from direct sunlight and heat.

WARNING: Keep out of reach of children. FIRST AID: For any major exposure, get prompt medical attention. Flush eyes well with water. Wash skin with soap and water. If ingested, do not induce vomiting; call doctor or Poison Control immediately.

LIMITED LIFETIME ENGINE WARRANTY: B-ECO's Limited Lifetime Engine Warranty guarantees your vehicle's engine against lubrication related failure for as long as you own your vehicle with continuous usage of B-ECO Engine Life Treatment. It gives you that extra peace of mind knowing that your engine is covered up to \$5000 against lubrication related failure. Engines with less than 150,000 miles or less than 15 years old are covered. Available in the USA only. Certain restrictions apply. Please refer to the warranty for details, eligibility, and limitations. Registration is easy; simply fill out the Warranty Registration Form enclosed with each product and mail it in.

ENGINE LIFE TREATMENT

Advanced Lubrication Technology

B-ECO Engine Life Treatment is formulated with XPL+® Xtreme Pressure Lubrication developed and perfected over decades by ProOne – a world leader in state-of-the-art environmentally friendly lubrication technology used and trusted by top Fortune 500 companies around the world.

HOW IT WORKS

XPL+® Xtreme Pressure Lubrication takes lubrication to the next level. The proprietary technology helps reduce friction and wear on the internal parts of the engine and extend oil change intervals. Plus, it will not build-up, change tolerances, alter oil flow through galleys and filters, or void manufacturer warranties.

Typical lubricants tend to migrate away from heat and will break down under high heat conditions. In contrast, XPL+® is attracted to and activated by heat. It bonds to metal and other lubricated surfaces even under extreme heat and pressure, giving B-ECO Engine Life Treatment unprecedented film strength and extreme pressure protection.

Case-in-point, the strongest load capacity a heavy-duty diesel bearing can withstand is 14,000 psi. Most, if not all motor oils, and many additives can only withstand 4,000 psi of pressure. A few additives may reach up to 10,000 psi of pressure. But XPL+® can withstand over 200,000 psi of pressure. That's 50 times more powerful than regular lubricants!

TRUSTED & PROVEN

The patented XPL+® technology has been stringently tested and certified by leading testing laboratories using the International Standards developed by ASTM International. Plus, it has been used for years and proven in the industrial and commercial world by leading manufacturing, mining, transportation and oil & gas companies.

Testing shows:

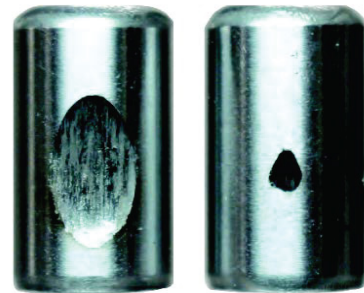

- Wear reduction vs. regular motor oil in ASTM D-4172 Four Ball Wear Test
- Highest possible rating in ASTM D-130 Copper Corrosion Test
- 0 rusting even at 72 hours in ASTM B-117 Salt Spray Corrosion Test
- Superior to oil alone in ASTM D-2782 Timken Load Method of Measurement of Extreme Pressure Properties of Lubricating Fluids Test
- Exceptional load-carrying ability in ASTM D-3233 Falex Pin & Vee Block Test

XPL+® vs Ordinary Lubricants

	Typical Lubricants	XPL+®
Charge	Negative [-]	Positive [+]
Bonding Flow	Flowing	Bonding
Reaction to Heat & Pressure	Migrates Away	Migrates Towards
Film Strength	Limited	Extraordinary
Environmentally Friendly	No	Yes

Withstands 50 Times More Pressure

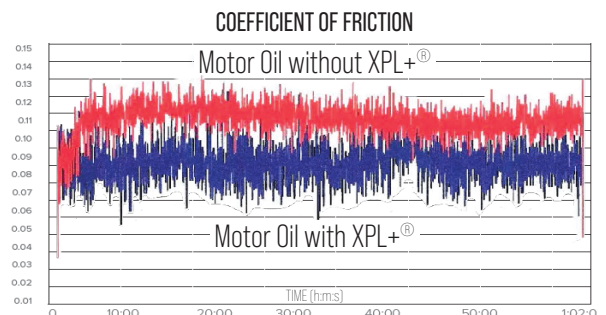

Without XPL+®
@ 4,000 psi

vs

With XPL+®
@ 200,000 psi

Reduces Damaging Friction & Heat
