

B-IMMUNE+

Turmeric Curcumin Supplement

NATURAL IMMUNE SUPPORT

Naturally strengthen your immune system! B-IMMUNE+ all-natural turmeric curcumin immune support supplement is formulated to maintain and enhance the body's natural defenses. Plus, it helps quickly reduce symptoms and provide fast relief when you're not feeling well.

For best results, take B-IMMUNE+ on a daily basis to support a robust immune system and maintain a healthy anti-inflammatory response. To combat illness and inflammation, increase the dosage when you first begin experiencing symptoms in order to help you feel better faster.

B-IMMUNE+ is powered by BioBDMC™ – a patented turmeric curcumin extract that is clinically proven to support immune system efficiency; support healthier inflammatory activity; and provide relief from pain, swelling, and other common ailments associated with systemic inflammation.

It also contains ImmuniBoost™, which is made of potent healing herbal extracts and medicinal mushrooms. This proprietary blend is rich in antioxidants and contains natural ingredients with strong evidence for boosting the immune system, reducing inflammation, and fighting viral infections.

Strengthen Immune Support!

BENEFITS MAY INCLUDE:

- Strengthen Robust Immune System Response
- Support Anti-Inflammatory Response
- Provide Fast Relief from Symptoms
- Reduce Inflammation, including Aches and Pains

PRODUCT DETAILS:

- All-Natural Immune Support Supplement
- Take Daily for Maintenance; Increase Dosage for Therapy
- Contains BioBDMC™ – a Patented Turmeric Curcumin Extract
- Contains Proprietary ImmuniBoost™ Herbal Blend Rich in Antioxidants

Servings Per Container: 60

Serving Size: 1 capsule

Amount Per Serving	% DV
--------------------	------

Curcuma longa (BioBDMC™30)	200 mg †
---	-----------------

(nlt 95% Curcuminoids) (patented tech)
Curcuminoid proportions standardized:
curcumin 1 diferuloylmethane (52%),
curcumin 2 demethoxycurcumin (12%),
curcumin 3 bisdemethoxycurcumin
(BDMC) (30%)

Proprietary ImmuniBoost™ 300 mg	†
--	----------

Olive Leaf Extract, Acerola Berry, Astragalus,
Echinacea, Reishi Mushroom, Oregon

† Daily Value (DV) not established.

Other Ingredients: Vegetable Capsule (hydroxypropyl methylcellulose, water) Magnesium Stearate, Silicon Dioxide

Vegan Friendly and Gluten Free

BioBDMC™ and ImmuniBoost™ patent technology and trademark are registered and owned by Biologic Pharmamedical Research Inc.

Manufactured in a cGMP certified and FDA registered facility. Third party tested.

These statements have not been evaluated by the USFDA nor SAHPRA. This product is not intended to diagnose, treat, cure, or prevent any disease.

Individual results will vary. Best if taken as part of an overall healthy lifestyle. As with many health supplements, consistent use is key to maximizing the benefits.

B-IMMUNE+

Immune Support Supplement

RESEARCH FINDINGS

B-IMMUNE+ contains BioBDMC™ – a patented turmeric curcumin extract. Many high-quality studies show that turmeric has major benefits for your body and brain. It has powerful anti-inflammatory effects and is a very strong antioxidant. Curcumin is a bioactive substance in turmeric that fights inflammation at the molecular level, which is important in preventing and even treating diseases. Turmeric also has potent antioxidant effects; it neutralizes free radicals on its own as well as stimulates the body's own antioxidant enzymes.

Curcumin BioBDMC™ performs as much as 14 x better than Ibuprofen and Aspirin

Curcumin BioBDMC™ is a patented pharmacology delivered by a novel research-supported mechanism that is peer-reviewed and published. It has been shown to work as much as 14 x more effectively than Ibuprofen and Aspirin (ASA). What's more, Curcumin BioBDMC™ works faster (in hours) instead of days (like regular curcumin 95% does).

Basic pharmacology regular curcumin 95% versus Curcumin BioBDMC™

Curcumin BioBDMC™ inhibits two key regulator proteins (NF-kB & MSK1) in the inflammatory pathway. Regular curcumin (even the 95% variation) can only inhibit one of these (NF-kB). Curcumin BioBDMC™ inhibits a second key protein (MSK1) involved in activating inflammation. Regular Curcumin of many types tested and displayed in the same graph cannot inhibit (stop) this protein (MSK1). Ultimately, Curcumin BioBDMC™ inhibits two key proteins (MSK1 and NF-kB) while regular curcumin 95% only inhibits one of these (NF-kB) as is commonly known to be its anti-inflammatory mechanism.
