

InstaGlove™

Kills 99.99% of Germs

LONG-LASTING SANITIZING GEL

Get long-lasting protection to keep you and your loved ones safe! InstaGlove™ sanitizing gel provides an invisible shield against harmful germs while keeping skin soft and supple. It is proven to provide up to 6 hours of protection even after multiple hand washings and exposure to the environment.

In clinical testing, the proprietary formula was found to be 99.99% effective against a wide spectrum of bacteria, viruses, and fungus. Each 1 oz bottle of alcohol-free InstaGlove™ has 200+ applications, and one drop is enough for both hands and provides protection for 4-6 hours. In comparison, the typical 1 oz alcohol-based sanitizer has just 20 applications on average and only protects for up to 2 minutes.

InstaGlove™ has been tested by the FDA against more bacteria, virus, and fungus than the average hand sanitizer with superior results. It features a patented technology that metabolically kills harmful organisms and prevents bacteria from building resistance.

Plus, InstaGlove™ softens skins and helps strengthen the skin's moisture barrier. Study participants report that it helped restore their dry and cracked hands. It is also safe to use on other parts of the body and has been reported to help with wrinkles and acne.

Clinically Proven Alcohol-Free Sanitizer!

BENEFITS MAY INCLUDE:

- Effective Against Bacteria, Virus, and Fungus
- Prevents Bacteria from Building Resistance
- Strengthens Skin's Moisture Barrier
- Softens Skins; Restores Dry, Cracked Hands

InstaGlove™

Long-Lasting Sanitizing Gel

PRODUCT DETAILS

SUGGESTED USE: As a hand sanitizer, pump one drop into hands and rub together until fully distributed across skin. One application lasts 4-6 hours. It is also safe to use on other parts of the body.

WARNINGS:

- For external use only.
- Avoid contact with eyes. In case of eye contact, flush eyes with water. Stop use and ask doctor if irritation or redness develops or if condition persists more than 72 hours.
- Keep out of reach of children. If swallowed, get medical help or contact Poison Control Center right away.

FDA REGISTERED HAND SANITIZER: While typical hand sanitizers test for 3 bacteria, InstaGlove™ tested for 13 and came back with superior results. It can kill the following organisms. It also tested 99% effective against Human coronavirus*. (*Human coronavirus is not COVID19 and is a surrogate.)

- Candida albicans
- Candida tropicalis
- Clostridium difficile (C. diff)
- Enterococcus faecalis (ATCC No. 51299)
- Enterococcus faecalis (ATCC No. 51575)
- Enterococcus faecium
- Escherichia coli (E. coli)
- Klebsiella pneumoniae
- Pseudomonas aeruginosa
- Serratia marcescens
- Staphylococcus aureus MRSA
- Staphylococcus epidermidis
- Streptococcus pyogenes

MADE IN USA

Drug Facts

Active Ingredient

Benzalkonium Chloride 0.1% ... Antimicrobial

Purpose**Inactive Ingredients**

Cyclopentasiloxane, Dimethicone
Crosspolymer, PPG-3 Benzyl Ether
Ethylhexanoate, Octadecyldimethyl
Trimethoxysilylpropyl Ammonium Chloride

Uses: Hand Sanitizing

Does NOT Contain: Alcohol, Water,
Petroleum, Fragrances
